

- page 129, third paragraph from top ➔ “Even if the original aim of PLS-SEM was not parameter estimation, inconsistent estimates can considerably deceive the interpretation of the results of a PLS- SEM analysis thus leading to wrong conclusions about the significance of a given effect. For **these reasons**, the inconsistency issue...”
- page 171, FIGURE 4.6 ➔ the arrow between ACTIVITY and RECOMMENDATION should go the other way round, that is, it should go from ACTIVITY to RECOMMENDATION
- 29/10/2023 – **Note on the goodness-of-fit indexes** ➔ the implementation of the goodness-of-fit indexes contained a bug, therefore the values reported in the book’s examples are incorrect. We updated the code on GitHub, so we kindly ask all users to install the latest version of the package.
